Introduction to Data Analytics Curriculum

Introduces students to critical data analysis concepts and the Alteryx Designer platform over the course of twenty classes (~75 minutes per class)

The curriculum includes:

- PowerPoint slides and handouts to support conceptual and technical knowledge
- Workflow-based lessons with detailed explanations for educators
- Homework assignments, quizzes and a project to test the students' skill development

Students that complete this curriculum will gain a solid understanding of data, prep and blend techniques, data analysis, and dynamic processes. Students will also be prepared to earn both their Alteryx Foundation Micro-Credential and Core Certification.

[Download](#) a sample lesson and a detailed breakdown of the curriculum to learn more.

If you'd like access to the full curriculum, complete this [form](#) and an Alteryx representative will send you a link in your email.
